

# SCIENTIFIC SEER:

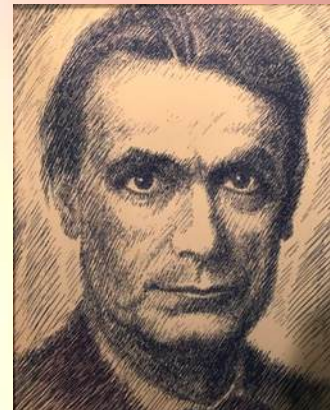

*Rudolf Steiner & the  
Mission of Whitsun*

Whitsunday, 9<sup>th</sup> June, 3pm  
Stonehaven Farms, Hershey, USA

## Whitsun Festival & Muriel Brigouleix Life Celebration

On the eve of the 20<sup>th</sup> century Rudolf Steiner pioneered intuitive thinking or spiritual cognition. How did 'new thinking' arise out of Goethe's scientific insights and how can it usher in the shortfall of the digital age—true social harmony?

In this session we shall consider Rudolf Steiner's biography as the synthesis of both esoteric Mystery wisdom, and modern scientific technology. Additionally, we shall consider the biography of Corps de Michael member, Muriel Francine Brigouleix, who crossed the threshold on Good Friday. How did Muriel's spirit striving offer a shining example of Steiner's vision for the role of spiritual community on the road to self knowledge (also known as the quest for the Holy Grail)? How did Muriel's Michaelic service and lifelong Parzivalic journey help fulfill the great promise of Whitsun? In the "flames of spirit knowledge" descending on the disciples gathered in community on the first Whitsunday we can experience the free individuality as a revelation of the Spirit of the Universally Human.

Festivities will include a festival lecture, "Scientific Seer", conversation, multilingual verses,

remembrances of Muriel by members and friends, potluck supper, and possible Nature Walk. Program follows. For information call: 717-964-3376,
